Contents to volume 119 (1989)

Number 1 – 21 April 1989

Research reports

Quantification of IgG and IgG4 antibodies to bee venom phospholipase A_2 by competitive inhibition in ELISA
R. Rieben and K. Blaser (Switzerland) 1

Inhibition of antibody production at high cell density following mitogen stimulation and isotype switching in vitro
M.G. McHeyzer-Williams and G.J.V. Nossal (Australia) 9

Quantification of human high molecular weight kininogen by immunoblotting with a monoclonal anti-light chain antibody
S. Reddigari and A.P. Kaplan (U.S.A.) 19

Comparison of different ELISAs for the detection of monoclonal antibodies to human interferon-α. Implications for antibody screening
M.L. Overall, S. Marzuki and P.J. Hertzog (Australia) 27

Optimizing the solid-phase immunofiltration assay. A rapid alternative to immunoassays
O.E. IJsselmuiden, P. Herbrink, M.J.M. Meddens, B. Tank, E. Stolz and R.V.W. Van Eijk (The Netherlands) 35

A fluorescence-based assay for quantitation of lymphokine-activated killer cell activity
T. Volgmann, A. Klein-Struckmeier and H. Mohr (F.R.G.) 45

Evaluation of a solid-phase monoclonal antibody-based enzyme immunoassay for insulin in human serum
M.-J. Storch, A. Alexopoulos and L. Kerp (F.R.G.) 53

A simple hemagglutination method for the detection of cell surface antigens
D. Kokkinopoulos, S. Perez and M. Papamichail (Greece) 59

Local tissue injury induced by glucose oxidase conjugated with anti-collagen antibody
V.R. Muzykantov, M.M. Peclo and O.Y. Printseva (U.S.S.R.) 65

Differential determination of recombinant human interleukin-1α and its deamidated derivative by two sandwich enzyme immunoassays using monoclonal antibodies. Comparison with a polyclonal antibody-based competitive enzyme immunoassay
N. Sunahara, S. Kawata, K. Kaibe, R. Furuta, M. Yamayoshi, M. Yamada and S. Kurooka (Japan) 75

A rapid method for quantitation of antiviral antibodies
J.D. Peterson, J.Y. Kim, R.W. Melvold, S.D. Miller and C. Waltenbaugh (U.S.A.) 83

In vivo localization of lymphocytes labelled with low concentrations of Hoechst 33342
D. Loeffler and S. Ratner (U.S.A.) 95

Binding of complement components C1q, C3, C4 and C5 to a model immune complex in ELISA
A. Larsson and J. Sjöquist (Sweden) 103

Preparation of monoclonal antibodies against methamphetamine
T. Usagawa, M. Nishimura, T. Uda and Y. Nakahara (Japan) 111

Indirect double sandwich ELISA for the specific and quantitative measurement of mouse IgM, IgA and IgG subclasses
A.-S. Klein-Schneegans, C. Gavériaux, P. Fonteneau and F. Loor (France, Switzerland) 117

Detection of low and high affinity binding sites with fluoresceinated human recombinant interleukin-2
A. Harel-Bellan, Z. Mishal, J. Willette-Brown and W.L. Farrer (U.S.A., France) 127

Characterization of liposome suspensions by flow cytometry
N.K. Childers, S.M. Michalek, J.H. Eldridge, F.R. Denys, A.K. Berry and J.R. McGhee (U.S.A.) 135

An improved method for the detection of IgE antibody of defined specificity by ELISA using rat monoclonal anti-IgE antibody
T. Hirano, N. Yamakawa, H. Miyajima, K. Maeda, S. Takai, A. Ueda, O. Taniguchi, H. Hashimoto, S. Hirose, K. Okumura and Z. Ovary (Japan, U.S.A.) 145

Review article

Immunoblotting and dot blotting
D.I. Stott (U.K.) 153

Research reports

Evaluation of a fluorochrome assay for assessing the bactericidal activity of neutrophils in human phagocyte dysfunctions
R. Bellinati-Pires, S.E. Melki, G.M.D.D. Colletto and M.M.S. Carneiro-Sampaio (Brasil) 189

Flow cytometric detection of anti-gliadin antibodies
G. Presani, S. Perticarari and M.A. Mangiarotti (Italy) 197

Re-examination and further development of a precise and rapid dye method for measuring cell growth/cell kill
M.B. Hansen, S.E. Nielsen and K. Berg (Denmark) 203

Fast ELISA for measuring serum antibody responses
M. Levine and R.L. Brumley, Jr. (U.S.A.) 211

An enzyme-linked immunosorbent assay for immune complex of HTLV-I
K. Ishibashi, S. Hanada, K. Uozumi, M. Otsuka, T. Sakurami and S. Hashimoto (Japan) 217

Purification of uteroglobin using monospecific antibodies coupled to divinylsulphone-activated agarose
D.R. Dannhorn, B. Wirth and C. Kirchner (F.R.G.) 223

The ability of normal human monocytes to phagocytose IgG-coated red blood cells is related to the number of accessible galactosyl and mannosyl residues in the Fc domain of the anti-red blood cell IgG antibody molecules
M.G. Malaise, P. Franchimont and P.R. Mahieu (Belgium) 231

Rat monoclonal antibodies. VII. Enhancement of ascites production and yield of monoclonal antibodies in rats following pretreatment with pristane and Freund's adjuvant
J.-P. Kints, P. Manouvriez and H. Bazin (Belgium) 241

Expansion of lymphokine-activated killer cells for clinical use utilizing a novel culture device
D. Colborn, J. Rinehart, B. Zwilling and J. Irr (U.S.A.) 247

A rapid and direct method for the detection and quantification of interleukin-1 receptors using 96 well filtration plates
R. Horuk (U.S.A.) 255

Isolation of pure villous cytotrophoblast from term human placenta using immunomagnetic microspheres
G.C. Douglas and B.F. King (U.S.A.) 259

Comparison of ascites production for monoclonal antibodies in BALB/c and BALB/c-derived cross-bred mice
F. Stewart, A. Callander and D.J. Garwes (U.K.) 269

Human non-transformed monocyte-derived macrophage cell lines
J.M.G. Sechler, M.K. Warren and J.I. Gallin (U.S.A.) 277

Technical note

The immunocross test. An immunoelectrophoretic method based on the difference between the isoelectric points of antigens and immunoglobulins
A. Viel and M. Le Maire (France) 287

Short communication

An [^{35}S]methionine cytotoxicity assay requiring small numbers of effector and target cells
K.E. Stedman and P.A. Campbell (U.S.A.) 291
